SUMMARY: Bldg at site is a large, reddish (probably brick) bldg. It is tall & squarish. It seems to be arranged in a pattern which has some inner open area, possibly several inner areas. Near bldg is a large open area. Bldg is in an area of similar-sized bldgs.

Inside bldg is clean, but old, dim, & yellowish. Poorly lit. An overall impression of small, narrow & intricate hallways, stairs, etc.
